## MESSAGE

**DR. VEDPRAKASH MISHRA**  
Hon'ble Chancellor

It is heartening to note that Annual Report of the Krishna Institute of Medical Sciences (Deemed University), Karad is being brought out, which covers the various 'plethora' of happenings in the academic year 2015-16.

The report so brought out would be a 'handy referral piece' of reading incorporating all the 'relevant informational details', which are of 'consequence and relevance'.

The 'Annual Report' also operationally turns out to be a mirror reflection of the 'happenings and doings' by the various constituent colleges under the ambit of the University. It brings out their 'creative and committed' activities in various domains, which pertain to teaching and learning, research, extension and also sustainable development of the society, as a whole.

An institution of higher learning cannot afford to have an 'ivory tower image' for themselves because that would amount to they being chopped and severed off from the 'societal obligations' and 'ground realities' thereto.

Krishna Institute of Medical Sciences (Deemed University), Karad with its constituent units is committed to catering to the 'cause' of society in an 'exemplary' manner, so as to render the best that is expected and desired out of it. The Annual Report categorically brings out this very aspect of commitment of the University to the larger societal good with a sense of accountable responsibility.

I record my sincere appreciation for the Editorial Board and their team for untiring efforts in 'actualizing' the same.

The universities must promote creativity. It is supposed to be inherent. However, new ideas can also be generated through brain-storming, recognition and rewards and positive environment. Give time and space to all. Creativity leads to Innovation, which is not the preserve of affluence but of a free, searching mind.

~ Shri. Chandrakant (Dada) Patil

Universities are places where minds are moulded, where we learn to reason, it is where new ideas are conceived. It is a place to realize the potential of human intellect, a place that encourages freedom of thought and ignites the curiosity in students to search for truth. It is a place where talents are fostered and character is built, it is a place where culture and traditions come together to earn each-others respect. It is a place which gives birth to friendship and unites us for peaceful co-existence. It is this sanctity, this autonomy that we hold close to our heart.
